

## SOMAȚIA DE PLATĂ ÎN REGLEMENTAREA ACTUALĂ

**Ioan Eugen IOJA \***  
**Simena Lidia IOJA \*\***

***Abstract:** The present article approaches, from a theoretical and practical point of view, a special procedure of recovering sure, liquid and exigible debts, available for creditors without paying great amounts of money for stamp taxes. This procedure is characterized through efficiency, simplicity and rapidity.*

*This procedure does not represent something new on the international juridical level, being adopted, a long time ago, by other countries with tradition in the market economy, such as: France, Italy, Austria, Germany, Portugal etc.*

*The authors of the article tried to present synthetically the most important and controversial problems from the specialty literature and from the practice in justice courts, by taking in consideration everything that was published about this matter until 01.01.2005, as well as the relevant legislation until nowadays.*

***Keywords:** Commercial, Payment Summons, Debts, Creditor, Procedure of Recovering.*

***JEL Classification:** K40*
