**ABSTRACT:** *The economic and social life are considered by most authors as necessary in order to properly understand the essential traits of law and consequently as having a particular weight among all material sources of law. The role of the economic and especially financial-banking environments in the process of formation and functioning of law is very complex and difficult to underline. However, it is our goal in this paper to try and extract the main controversies in this inter-correlation between law and economics.*

**KEY WORDS:** *economy, source of law, the legal provision, development, society*  
**JEL CODE:** *K 1*
