

**„FROM A BIRD'S EYE VIEW FOR THE BENEFIT OF THE
PUBLIC ADMINISTRATION?!”
- SOME RELEVANT ADMINISTRATIVE USES OF DRONES -**

Balázs SZABÓ*

ABSTRACT: *In addition to the smartphone applications, some specialized administrative bodies of the public administration have additional opportunities to facilitate the activities of the authorities. One of the important technical and development tools of the 20th century is the range of drones originally developed for military purposes. Undoubtedly, drones can be apostrophized as one of the most popular technical tools, based on the fact that in addition to their ever-expanding uses, they also provide excellent help for leisure activities and outdoor photo/video documentation. In addition, we can find their application in more and more fields of our Hungarian public administration system. In recent years, the use of drones has been successfully introduced in more and more administrative areas, which makes the work of the authorities more efficient and faster, which in many cases can lead to the saving of human lives too. From these areas of expertise, I have highlighted some of the good practices that I consider to be most important and may give some positive expressions to implement them in other fields.*
